

PURINA

GAME BIRD CHOW

PURINA RESEARCHED FOR SUPERIOR GAME BIRDS

Purina® Game Bird Startena® (5419)

Purina Researched for Superior Game Birds

What It Is...

A complete ration formulated to support the development of turkeys, pheasants, quail, chukars, guinea fowl and other exotic game birds from 0 to 6 weeks of age. Purina® Game® Bird Startena® supports strong skeletal growth, proper muscle development and feather growth. Available in a crumble to encourage consumption.

FEATURES

BENEFITS

■ Complete Feed

■ Easy to Use

Contains the proper nutrients to help promote the growth of young birds.

■ Specifically Formulated for Young Birds

Designed to help promote rapid growth through strong bone and muscle development.

■ Flexibility

Purina® Game Bird Startena® is suitable for all species of game birds.

■ Insurance

The crumble size, when paired with good management practices, is small enough to limit the occurrences of starve-outs.

■ High Protein (30%)

■ Better Performance

The protein level meets the needs of growing birds to get them off to a great start and to begin the deposition of muscle.

■ Risk Reduction

■ Aggression and Cannibalism

The proper blend of proteins and their amino acids and salt combined with good management practices help to suppress aggressive behaviors and cannibalism.

■ Heat Stress

Contains Vitamin C to support the birds' well-being during periods of heat stress.

■ Consistent Quality

■ Uniform Nutrition

The high-quality crumbles provide a source of complete and balanced nutrition in every bite.

How To Feed...

Feed free-choice to birds as a sole ration until 6 weeks of age. Start with a small amount on paper or cardboard to make sure that all birds begin eating.

Important Considerations:

1. Clean, fresh water should be available to the birds at all times.
2. A feeding program is only as effective as the management practices followed.

Caution:

Store in a dry, well-ventilated area free from rodents and insects. DO NOT use moldy or insect-infested feed.
